

Output of Project

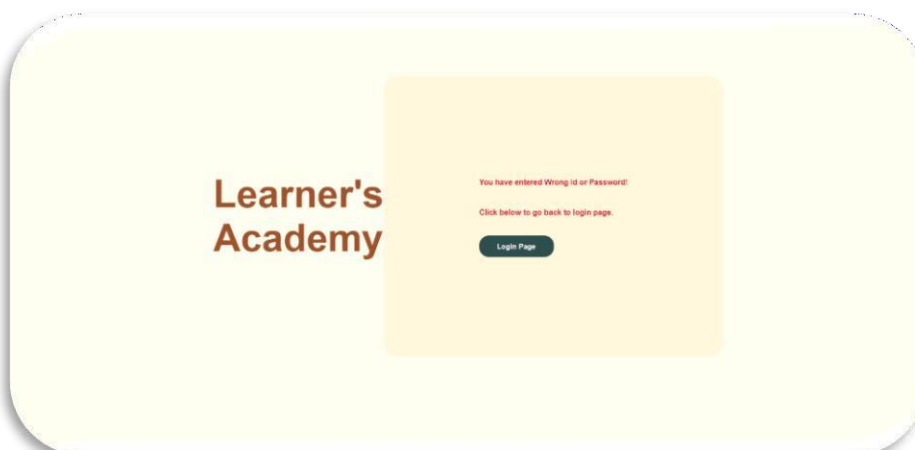

The project named **Learners Academy** created by **Edwin A** is based on java with Servlet, JSP, JDBC, Hibernate, Tomcat server and CSS. In this project we are seeing how the admin can work for 4 different pages.

1. Once we run our project named `Learners_Academy_Project`, then login page will be shown to the browser. As we are only developing an Admin side website, we keep our index page as Login page.

The screenshot shows the login page of 'Learner's Academy'. On the left, the text 'Learner's Academy' is displayed in a large, bold, brown font. To the right, there is a light yellow rectangular box containing the login form. The form has two input fields: 'User Name' and 'Password', both with light blue borders. Below the 'Password' field is a dark green 'Login' button. The background of the entire page is a light cream color.

2. Once we jump to login page, here admin has to enter id & password. If anyone will be wrong it will redirect to login error page and if anyone will be blank it will error.

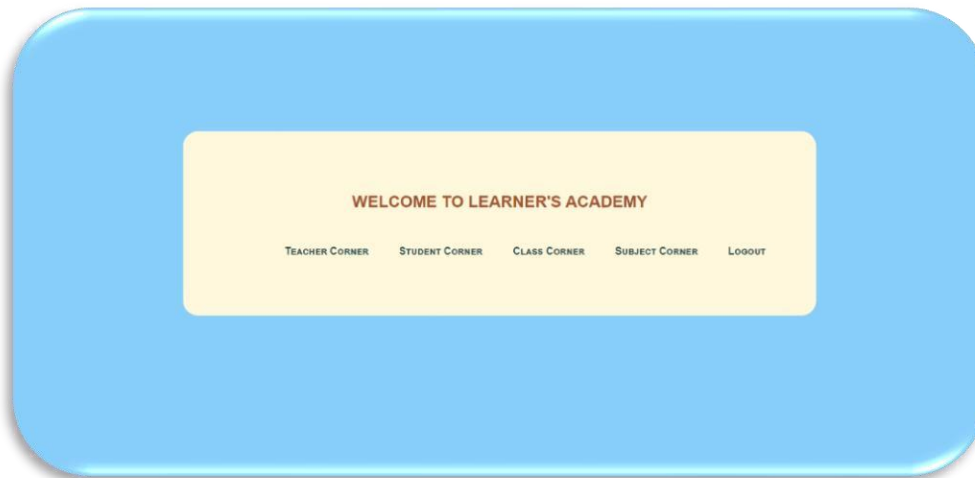

The screenshot shows the login error page of 'Learner's Academy'. On the left, the text 'Learner's Academy' is displayed in a large, bold, brown font. To the right, there is a light yellow rectangular box containing the error message. The message reads: 'You have entered Wrong id or Password!' in red text, followed by 'Click below to go back to login page.' in a smaller red font. Below the text is a dark green 'Login Page' button. The background of the entire page is a light cream color.

The screenshot shows the login page of 'Learner's Academy' with a password hint. On the left, the text 'Learner's Academy' is displayed in a large, bold, brown font. To the right, there is a light yellow rectangular box containing the login form. The form has two input fields: 'User Name' and 'Password', both with light blue borders. Below the 'Password' field is a green button with a yellow key icon and the text 'Please fill out this field'. Below this is a dark green 'Login' button. The background of the entire page is a light cream color.

Output of Project

3. If Admin enters correct detail, then admin will be redirected to the home page..

4. So, after went to home page we have 4 different tasks associated and one logout link. If Admin will click on teacher corner, admin will be jump to teacher list page.

a. Any of associated page from Teacher Corner, Student Corner and Subject Corner can do 4 tasks.

- i. Show List
- ii. Add Details
- iii. Edit Details
- iv. Delete Details

b. Each of details above mention are associated with every page. Let's have a look.

5. List of Teacher Page
